<https://datarockie.com/>

## Language

- Thai (Native)
- English (TOEIC score : 700)

## Skills

- **Programming Language**
  - SQL
  - R
  - Python
- **Software**
  - Microsoft Office (Word/Excel/ PowerPoint)
  - Google Sheet
  - Microsoft Power BI

## University Activity

**Startup Thailand League**  
2017

- Team up with engineer students for startup team “Fair Hand”, a mechanical hand designed for stroke patients.
- Designed business plan, pitch, and presentation.

**Fintech Machine Learning Project**  
**SCB**  
2019

- Collaborating Fintech projects from SCB, teaming up with CMU’s Departments of Computer Engineering students.
- This project's goal is to predict stock price change by using machine learning model. Input is fundamental factors based on quantity of good or bad words in 56-1 form.
- The result is model can predict stock price but the problem is company tend to avoid/less using bad words in 56-1 form (garbage in, garbage out). This is the reason why this ML is not accurate enough.

## Work Experience

**Special Asset management**  
**Bangkok Bank (Head Office)**  
2019 - 2022

- Responsibilities for monitoring borrowers in the bank portfolio to pay on due date.
- Polite communication and negotiation with borrowers via email, phone calls, and face-to-face.
- Team player to co-worker and supervisor. Understand the business, and finances, analyze debt repayment ability to Make preliminary assessments of the viability of loans to be restructured.
- In Covid19 pandemic. Manage to help many borrowers to do Debt Restructuring by extending the loan maturity date, or reducing their monthly payments. Make SMEs survive in pandemic and preventing NPL for BBL.
